

Homework 3

Video: <https://youtu.be/QBIldabkZg8>

Self-Assessment: 100 points out of 100

Notes:

The video will show that control inputs accurately apply forces on the rigid body aircraft.

Control inputs are demonstrated in the following order:

$$\delta_a, \delta_e, \delta_r, \delta_t$$

Following this, the video demonstrates the effect of the wind by first applying a steady wind and then gusts.
